Value Proposition

- Duolingo is fun and effective. Game-like lessons and fun characters help user to build solid speaking, reading, listening, and writing skills.
- Duolingo works. Designed by language experts, Duolingo has a science-based teaching methodology proven to foster long-term language retention.
- User can track progress and can work toward language learning goals with playful rewards and achievements when you make practicing a daily habit!
- Competitive Leaderboards available for user as they learn alongside global community.
- Every language course is free. Although user can pay premium to get even better experience.

Duolingo Products

The Duolingo language learning app
Provides free access to courses in over 40 languages and has approximately 42 million monthly active users.

Duolingo Plus
Offers additional features such as ad-free experience, personalized practice lessons, and level skipping to over 2.5 million paying subscribers.

The Duolingo English Test
An AI-driven, on-demand English proficiency assessment that adapts based on performance and costs $49 per test.

Duolingo for Schools
A free web-based tool that helps teachers incorporate Duolingo into structured learning environments, allowing them to track students' progress.

Duolingo ABC
A free app designed for children aged three to six, offering over 300 lessons to develop early literacy skills.

Revenue Models

Duolingo makes money by leveraging its freemium business model that relies on a premium subscription offering, advertising, and in-app purchases (IAPs) to produce revenue.

Subscription
Duolingo Plus offers learners features such as an ad-free experience and additional learning and gamification features that enhance their learning experience. Approx 6% of MAU.

Advertising and Other Revenue
Generate advertising revenue from the sale of display and video advertising delivered through advertising impressions. Advertising & others contributed 18% to the revenue generated by Duolingo in 2021.

In-app purchases
In-app purchases consist of learners purchasing one-time benefits within the app, such as “streak freezes” and “timer boosts.” In addition, the Duolingo language learning app, Duolingo makes money from the Duolingo English Test by charging test takers a one-time fee.

USER PERSONA

Julliana

AGE	17 years

In App Notifications

Pop-ups, banners or alerts to with in the app interface, appears when user is actively using the app, consist of rewards or app-specific updates

TYPES OF NOTIFICATIONS ON DUOLINGO

Daily Practice Reminders

Remind users to practice their chosen language every day. The timing of these reminders can be customized by the user. The goal here is to help users build a consistent study habit.

Streak Reminders

User having current streak of consecutive days, the app will send notifications to remind them to maintain their streak. These reminders can help keep them on track and not lose motivation.

Progress Updates

These notifications let users know when they've reached a new level in their chosen language, completed a skill, or achieved a significant milestone.

Motivational Messages

These include encouraging messages and tips to boost the learner's motivation. It can also have congratulatory notes for user to boost their confidence.

Special Events or Challenges

Occasionally, Duolingo may send notifications about special events, challenges, or features that are available for a limited time.

Passive Aggressive Notifications

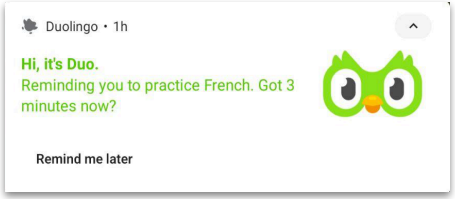

These are sent to users who after multiple reminders have not opened the app, to induce guilt, that acts as trigger. Ex: These reminders don’t seem to be working. We’ll stop sending them for now.

Leaderboard Updates

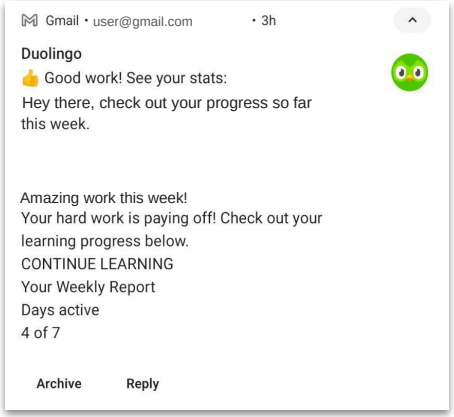

Duolingo has a competitive aspect with its leaderboard feature. Users can see how their progress compares to others, and they'll receive notifications when their ranking changes.

HIGH LEVEL DESIGN FOR NOTIFICATIONS

RELEVANT METRICS FOR NOTIFICATIONS

CTR

% of users who click on the content of the notification

A high CTR indicates that the notification content is engaging and relevant to the users.

Conversion

% of users who complete desired action (like completing a lesson or making a purchase) after clicking on the notification

This is a key metric to understand the effectiveness of the notifications in driving user actions.

Unsubscribe Rate

% of users who opt out of receiving notifications.

A high unsubscribe rate could indicate that users find the notifications annoying or irrelevant.

Retention Rate

% of users retained on Duolingo after receiving notifications over a certain period of time

This can help measure the long-term effectiveness of the notifications in retaining users.
